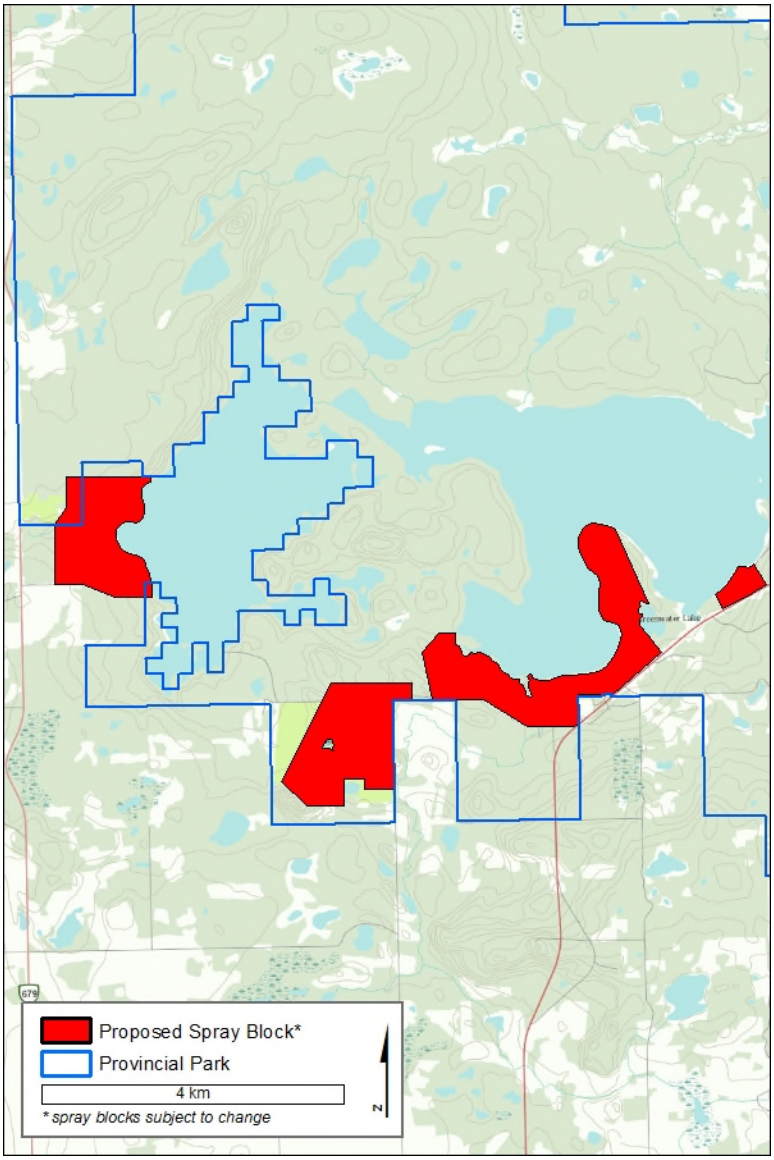
NOTICE
AERIAL SPRAYING TO CONTROL FOREST TENT CATERPILLAR

Marean Lake will be conducting an aerial spray program to control **Forest Tent Caterpillar**. This is a collaborative project with the Ministry of Parks, Culture and Sport at Greenwater Lake to reduce caterpillar numbers within built-up areas.

The program will utilize the biological insecticide **Foray® 48B**, which contains the naturally occurring soil bacterium: *Bacillus thuringiensis* var. *kurstaki* (*Btk*).

One aerial spray application will be conducted **between early-May and early-June 2015**.
As the program nears, actual spray dates will be posted.



Information on *Btk* and Foray 48B can be obtained at the following websites:
